AVAYA

**IP Office
Using a Voicemail Pro Intuity Mode
Mailbox**

Enterprise License (EN). End User may install and use each copy or an Instance of the Software only for enterprise-wide use of an unlimited number of Instances of the Software as indicated on the order, Documentation, or as authorized by Avaya in writing.

Named User License (NU). End User may: (i) install and use each copy or Instance of the Software on a single Designated Processor or Server per authorized Named User (defined below); or (ii) install and use each copy or Instance of the Software on a Server so long as only authorized Named Users access and use the Software as indicated in the order, Documentation, or as authorized by Avaya in writing. "Named User", means a user or device that has been expressly authorized by Avaya to access and use the Software. At Avaya's sole discretion, a "Named User" may be, without limitation, designated by name, corporate function (e.g., webmaster or helpdesk), an e-mail or voice mail account in the name of a person or corporate function, or a directory entry in the administrative database utilized by the Software that permits one user to interface with the Software.

Shrinkwrap License (SR). End User may install and use the Software in accordance with the terms and conditions of the applicable license agreements, such as "shrinkwrap" or "clickthrough" license accompanying or applicable to the Software ("Shrinkwrap License") as indicated in the order, Documentation, or as authorized by Avaya in writing.

Transaction License (TR). End User may use the Software up to the number of Transactions as specified during a specified time period and as indicated in the order, Documentation, or as authorized by Avaya in writing. A "Transaction" means the unit by which Avaya, at its sole discretion, bases the pricing of its licensing and can be, without limitation, measured by the usage, access, interaction (between client/server or customer/organization), or operation of the Software within a specified time period (e.g. per hour, per day, per month). Some examples of Transactions include but are not limited to each greeting played/message waiting enabled, each personalized promotion (in any channel), each callback operation, each live agent or web chat session, each call routed or redirected (in any channel). End User may not exceed the number of Transactions without Avaya's prior consent and payment of an additional fee.

Heritage Nortel Software

"Heritage Nortel Software" means the software that was acquired by Avaya as part of its purchase of the Nortel Enterprise Solutions Business in December 2009. The Heritage Nortel Software is the software contained within the list of Heritage Nortel Products located at https://support.avaya.com/LicenseInfo under the link "Heritage Nortel Products" or such successor site as designated by Avaya. For Heritage Nortel Software, Avaya grants Customer a license to use Heritage Nortel Software provided hereunder solely to the extent of the authorized activation or authorized usage level, solely for the purpose specified in the Documentation, and solely as embedded in, for execution on, or for communication with Avaya equipment. Charges for Heritage Nortel Software may be based on extent of activation or use authorized as specified in an order or invoice.

Copyright

Except where expressly stated otherwise, no use should be made of materials on this site, the Documentation, Software, Hosted Service, or hardware provided by Avaya. All content on this site, the documentation, Hosted Service, and the product provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part, including any code and software unless expressly authorized by Avaya. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Virtualization

The following applies if the product is deployed on a virtual machine. Each product has its own ordering code and license types. Unless otherwise stated, each Instance of a product must be separately licensed and ordered. For example, if the end user customer or Avaya Channel Partner would like to install two Instances of the same type of products, then two products of that type must be ordered.

Third Party Components

"Third Party Components" mean certain software programs or portions thereof included in the Software or Hosted Service may contain software (including open source software) distributed under third party agreements ("Third Party Components"), which contain terms regarding the rights to use certain portions of the Software ("Third Party Terms"). As required, information regarding distributed Linux OS source code (for those products that have distributed Linux OS source code) and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply is available in the products, Documentation or on Avaya's website at: https://support.avaya.com/Copyright or such successor site as designated by Avaya. The open source software license terms provided as Third Party Terms are consistent with the license rights granted in these Software License Terms, and may contain additional rights benefiting You, such as modification and distribution of the open source software. The Third Party Terms shall take precedence over these Software License Terms, solely with respect to the applicable Third Party Components to the extent that these Software License Terms impose greater restrictions on You than the applicable Third Party Terms.

The following applies only if the H.264 (AVC) codec is distributed with the product. THIS PRODUCT IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO (i) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD ("AVC VIDEO") AND/OR (ii) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE HTTP://WWW.MPEGLA.COM.

Service Provider

THE FOLLOWING APPLIES TO AVAYA CHANNEL PARTNER'S HOSTING OF AVAYA PRODUCTS OR SERVICES. THE PRODUCT OR HOSTED SERVICE MAY USE THIRD PARTY COMPONENTS SUBJECT TO THIRD PARTY TERMS AND REQUIRE A SERVICE PROVIDER TO BE INDEPENDENTLY LICENSED DIRECTLY FROM THE THIRD PARTY SUPPLIER. AN AVAYA CHANNEL PARTNER'S HOSTING OF AVAYA PRODUCTS MUST BE AUTHORIZED IN WRITING BY AVAYA AND IF THOSE HOSTED PRODUCTS USE OR EMBED CERTAIN THIRD PARTY SOFTWARE, INCLUDING BUT NOT LIMITED TO MICROSOFT SOFTWARE OR CODECS, THE AVAYA CHANNEL PARTNER IS REQUIRED TO INDEPENDENTLY OBTAIN ANY APPLICABLE LICENSE AGREEMENTS, AT THE AVAYA CHANNEL PARTNER'S EXPENSE, DIRECTLY FROM THE APPLICABLE THIRD PARTY SUPPLIER.

WITH RESPECT TO CODECS, IF THE AVAYA CHANNEL PARTNER IS HOSTING ANY PRODUCTS THAT USE OR EMBED THE H.264 CODEC OR H.265 CODEC, THE AVAYA CHANNEL PARTNER ACKNOWLEDGES AND AGREES THE AVAYA CHANNEL PARTNER IS RESPONSIBLE FOR ANY AND ALL RELATED FEES AND/OR ROYALTIES. THE H.264 (AVC) CODEC IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO: (I) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD ("AVC VIDEO") AND/OR (II) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION FOR H.264 (AVC) AND H.265 (HEVC) CODECS MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE HTTP://WWW.MPEGLA.COM.

Compliance with Laws

You acknowledge and agree that it is Your responsibility for complying with any applicable laws and regulations, including, but not limited to laws and regulations related to call recording, data privacy, intellectual property, trade secret, fraud, and music performance rights, in the country or territory where the Avaya product is used.

Preventing Toll Fraud

"Toll Fraud" is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company's behalf). Be aware that there can be a risk of Toll Fraud associated with your system and that, if Toll Fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya Toll Fraud intervention

If You suspect that You are being victimized by Toll Fraud and You need technical assistance or support, call Technical Service Center Toll Fraud Intervention Hotline at +1-800-643-2353 for the United States and Canada. For additional support telephone numbers, see the Avaya Support website: https://support.avaya.com or such successor site as designated by Avaya.

Security Vulnerabilities

Information about Avaya's security support policies can be found in the Security Policies and Support section of https://support.avaya.com/security.

Suspected Avaya product security vulnerabilities are handled per the Avaya Product Security Support Flow (https://support.avaya.com/css/P8/documents/100161515).

Downloading Documentation

For the most current versions of Documentation, see the Avaya Support website: https://support.avaya.com, or such successor site as designated by Avaya.

Contact Avaya Support

See the Avaya Support website: https://support.avaya.com for product or Hosted Service notices and articles, or to report a problem with your Avaya product or Hosted Service. For a list of support telephone numbers and contact addresses, go to the Avaya Support website: https://support.avaya.com (or such successor site as designated by Avaya), scroll to the bottom of the page, and select Contact Avaya Support.

Trademarks

The trademarks, logos and service marks ("Marks") displayed in this site, the Documentation, Hosted Service(s), and product(s) provided by Avaya are the registered or unregistered Marks of Avaya, its affiliates, its licensors, its suppliers, or other third parties. Users are not permitted to use such Marks without prior written consent from Avaya or such third party which may own the Mark. Nothing contained in this site, the Documentation, Hosted Service(s) and product(s) should be construed as granting, by implication, estoppel, or otherwise, any license or right in and to the Marks without the express written permission of Avaya or the applicable third party.

Avaya is a registered trademark of Avaya Inc.

All non-Avaya trademarks are the property of their respective owners. Linux® is the registered trademark of Linus Torvalds in the U.S. and other countries.

Chapter 1: Introduction

This document covers mailbox operation on IP Office system using a Voicemail Pro server running in Intuity emulation mailbox mode. If you are not sure which system you have and the mode it is operating in, see [Which Voicemail Do I Have?](#) on page 7.

- Intuity is a set of spoken voicemail mailbox prompts supported by many Avaya voicemail systems. Your system supports a sub-set of the full Intuity feature set.

Which Voicemail Do I Have?

The operation of voicemail is highly customizable. So it is important that you use the correct mailbox guide:

How Do I Determine Which Guide to Use?

Your system administrator can tell you what type of voicemail your Avaya IP Office system is using. However, the following process may help you to determine it for yourself:

1. On your phone, dial `*17` to access voicemail.

2. After the initial greeting, if the voicemail asks "Please enter extension and pound key", then the voicemail system is running in Intuity mode. Otherwise, go to step 3.

   a. Press `7`. If the system responds with a set of scan options, your voicemail server is Voicemail Pro.

   b. If the system doesn't respond, your voicemail server is Embedded Voicemail.

3. If otherwise, your voicemail system is running in IP Office mode. Press `*05`.

   a. If the system responds with a set of options, your voicemail server is Embedded Voicemail.

   b. If the system doesn't respond, your voicemail server is Voicemail Pro.

Depending on the above, the following mailbox user guides are available:

- [Using IP Office Embedded Voicemail IP Office Mode](#)

- [Using IP Office Embedded Voicemail Intuity Mode](#)
- [Using a Voicemail Pro Intuity Mode Mailbox](#)
- [Using a Voicemail Pro IP Office Mode Mailbox](#)

Mailbox Limits and Automatic Message Deletion

Your mailbox is limited to 60 minutes of messages and recordings. Once that limit is reached, additional callers are told that they cannot leave a message and your system administrator may receive an alarm.

In normal use, the system automatically deletes a message 30 days after you have played any part of it.

Chapter 2: Logging Into Your Mailbox

The way in which you log in to your Intuity mailbox is the same whether or not it is the first time you have logged in. The prompts that you hear are different.

- When you log in to your mailbox for the first time, you may be asked to set a mailbox password and to record your name.

- For subsequent times, you need only enter your mailbox number and password.

- Many Avaya telephones have a key or menus for gaining access to voicemail mailboxes.

- You can also use the one-X Portal for IP Office application. It can display when you have voicemail messages.

- Occasionally, you may want to log in to your mailbox from a telephone that is not on the telephone network of your organization. For more information, see Logging In Remotely on page 13.

First-Time Login

About this task

The first time you call your mailbox you are prompted to record your name and change the mailbox password. The name that you record is used in various system announcements and in the voicemail system directory search.

Similarly your system administrator can tell you if your mailbox already has a password set. Typically a password is not set until the first time you log in.

Procedure

1. On any extension, dial ***17**.

2. If you are dialing from your own extension, press **#**. Otherwise enter your extension number and press **#**.

3. Enter your password and press **#**. If a password has not been set yet, just press **#**.

4. You are asked to enter a new password. Enter and confirm the password you want to use.

- You must select a password of at least 6 digits. The system allows passwords of up to 15 digits.

- Your password cannot be the same as your extension number, use repeated digits or include consecutive numbers.

- Other common key pad patterns such as 1397 are not allowed.

- Your system administrator can change some of the minimum requirements and will inform you if they are different.

5. Record your name when you are prompted.

   a. Press **1** and at the tone, speak your name.

   b. Press **1** again. Your recording is played back.

   c. Either press **#** to accept the recording or **1** to record again.

6. After you log in, the voice prompts tell you what to do. For a summary, see [Mailbox Options](#) on page 8.

- For help at any tome, press ***4**.

- To return to the top-level activity menu at any time, press ***7**.

- To return to the previous menu, press **#**.

- To exit voicemail, press ****9**.

[Logging Into Your Mailbox](#) on page 11

Logging In

About this task

If you have already logged in once and recorded your name and set a password, you need only enter your mailbox number and the password.

Procedure

1. On any extension, dial ***17**.

2. If you are dialing from your own extension, press **#**. Otherwise enter your extension number and press **#**.

3. Enter your password and press **#**.

4. After you log in, the voice prompts tell you what to do. For a summary, see [Mailbox Options](#) on page 8.

- For help at any tome, press ***4**.

- To return to the top-level activity menu at any time, press ***7**.

- To return to the previous menu, press **#**.

- To exit voicemail, press ****9**.

[Logging Into Your Mailbox](#) on page 11

Logging In Remotely

About this task

You can log in to mailboxes from a telephone that is not on your telephone system. Your system administrator may configure a special number for that. However, if that is not the case, you can use the method below to log in remotely.

If you have outcalling configured to an external number (see [Outcalling](#) on page 41), you can login to your mailbox after answering an outcalling notification call that you have a new message.

Procedure

1. Call your company and ask to be connected to a number that will go to voicemail. This means a number that will not be answered by a person, for example, your own extension number.

2. Wait for the voicemail system to respond and ask you to leave a message.

3. After the tone, do not leave a message but press **#**. In some cases you may hear the prompt "No message to save".

4. Dial ***7**. You are asked to select the mailbox that you require.

5. Enter your extension number and press **#**.

6. Enter your password and press **#**.

7. After you log in, the voice prompts tell you what to do. For a summary, see [Mailbox Options](#) on page 8.

   - For help at any tome, press ***4**.

   - To return to the top-level activity menu at any time, press ***7**.

   - To return to the previous menu, press **#**.

   - To exit voicemail, press ****9**.

[Logging Into Your Mailbox](#) on page 11

Logging into Visual Voice

About this task

Visual voice is a set of display menus that allow you to navigate the contents of a mailbox and the mailbox settings. See Visual Voice Controls on page 58.

By default, the ✉ button on Avaya phones accesses the visual voice menus for the phone user's mailbox.

- You system administrator can also configure the visual voice menus for your phone to provide access to messages in other users and groups mailboxes.

Procedure

1. Either:

   a. Press the ✉ button on your Avaya phone.

   b. Press **Features**. Scroll down to **Visual Voice** and press **Select**.

   c. Press the optional **Visual Voice** button that has been programmed on your phone.

2. The visual voice options should appear on the phone's screen. See Visual Voice Controls on page 58.

3.

Logging Into Your Mailbox on page 11
Visual Voice on page 57

Chapter 3: Listening to Messages

When you have successfully logged in to your mailbox (see Logging In on page 12), you will hear an announcement telling you about the messages that you have. For example, you hear the number of voice messages.

You can listen to your messages or record a new message and send it.

If any of your messages are emails, you can also reply. If any of your messages are fax messages, you can specify a personal fax number so that you can forward or print them.You will only receive email and/or fax messages configured by your system administrator.

Playback Order - By Message Type

By default messages are played to you in the order listed below.

1. **Voice messages**
2. **Fax messages**
3. **Email messages**

Each message starts with a header, which contains details about who the message is from (if known) and when it was left. For fax messages, the header includes the number of pages. You can change the order if you prefer to hear the types of message in a different order, for example email messages first. For more information, see Setting the Order in which Messages are Played.

Playback Order - By Message Status

Message of all types are grouped in to the following categories. Priority messages are played first, followed by new messages and then old messages.

1. **Priority**: When a caller leaves a message they can mark it as a priority message.
2. **New**: A message that has not been listened to.
3. **Old**: After you have listened to a new message it becomes an old message. Unless you delete them sooner, messages are automatically deleted after 30 days. See Mailbox Limits and Automatic Message Deletion on page 8.(720 hours). Check with your system administrator to find out how long messages are stored before they are automatically deleted.

Listening to Messages

About this task

When you receive messages you can skip the header and listen to the message. While listening to your messages you can listen to all or just part of the message again.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. The number of new messages is announced. The announcement tells you how many of those messages are priority messages.

3. Press **2** to receive your messages. The header of the first message is played.

   - To skip the message header and listen to the message, press **0**.

4. As you listen to each message, you can use the following controls to listen to all or part of the message again.

   - To restart, press **2**.

   - To replay header, press **23**.

   - To pause/resume, press **3**.

   - To rewind 5 seconds, press **5**.

   - To restart, press ***5**.

   - To advance 5 seconds, press **6**.

5. When you have listened to the message, you have the following options:

   - To reply to the message, press **1** . See [Replying to a Voice Message](#) on page 17.

   - To forward a fax message, press ***1** . See [Forwarding a Fax Messages](#) on page 54.

   - To delete the message and continue to the next message, press ***3**.

   - To play the next message, press **#** .

Replying to a Voice Message

About this task

When you receive a voice message, you can send a reply message to the sender. You can choose to reply with or without the original message attached.

Procedure

1. While listening to the message, press **1**.

2. To reply to the message, press **1** again.

3. Select how to reply:

   - To reply without the original message attached, press **6**.

   - To reply with the original message attached, press **9**.

4. After the tone, record your reply.

5. When you have finished, press **#**.

Forwarding a Message

About this task

You can forward a voice message to another mailbox or mailboxes. You can add your own comment to the message to be played before the original message.

- An email message can only be forwarded to one mailbox at a time.

- You cannot forward a voice message if it has been marked as private by the sender.

- The comments that are recorded are played followed by the forwarded message.

- If you regularly forward messages to the same group of people, you can create and use a mailing list. See [Mailing Lists](#) on page 25.

- You can configure your mailbox to set address before sending or after. See [Addressing a Message Before You Record](#) on page 51.

Procedure

1. While listening to the message, press **1**.

2. Press **2** to forward the message with a comment.

3. Record your comment and press **#** to finish recording.

4. You are prompted for the forwarding addresses:

   a. To switch between entering addresses by extension number or by matching user names, press ***2**.

   b. Enter a mailbox number (or dial the required name) and then press **#**.

   c. To select and add a mailing list (see Mailing Lists on page 25), press ***5** . Press **#** to select one of your own lists. Otherwise, enter the mailbox number of the list owner and press **#**. Enter the number of the list and press **#**.

   d. Repeat until you have entered all the mailboxes to forward the message to.

   e. To delete the last number you entered, press ***3**.

   f. Press **#** to finish addressing.

5. Press **#** to send the forwarded message.

Listening to Messages on page 15

Sending a New Message

About this task

You can send a new message to another mailbox or mailboxes. By default, you specify the address of a message after you record it but you can change this option if you prefer to specify the address first.

- If you regularly forward messages to the same group of people, you can create and use a mailing list. See Mailing Lists on page 25.

- You can configure your mailbox to set address before sending or after. See Addressing a Message Before You Record on page 51.

Procedure

1. While listening to the message, press **1**.

2. Press **4**. You are prompted to record your new message. Record your comment and press **#** to finish recording.

3. You are prompted for the forwarding addresses:

   a. To switch between entering addresses by extension number or by matching user names, press ***2**.

     b. Enter a mailbox number (or dial the required name) and then press **#**.

     c. To select and add a mailing list (see [Mailing Lists](#) on page 25), press ***5** . Press **#** to select one of your own lists. Otherwise, enter the mailbox number of the list owner and press **#**. Enter the number of the list and press **#**.

     d. Repeat until you have entered all the mailboxes to forward the message to.

     e. To delete the last number you entered, press ***3**.

     f. Press **#** to finish addressing.

4. If required, select one of the following options:

   • To mark the message as private, press **1**. Private messages cannot be forwarded to users other than the original recipients.

   • To mark the message as priority, press **2**. Priority messages are played before new messages.

5. Press **#** to send the forwarded message.

Scanning Messages

About this task

You can scan through your messages and/or message headers without having to take any further action. The message header tells you when a message was received, who left it (if known) and the message length.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **7** to select scan messages.

   • To scan the headers and messages, press **1**.

   • To scan headers only, press **2**.

   • To scan messages only, press **3**.

3. While your message header or message is playing:

   • To rewind current message, press **2**.

   • To pause/resume, press **3**.

   • To exit scan messages, press ***7**.

4. When you are listening to a message, you can press **1** to respond or forward the message. You then have the options to:

- To call the sender of the message, press **0**.

- To leave a voice message in the callers mailbox, press **1**.

- To forward the message to another mailbox, press **2**.

- To send a new message to another mailbox owner, press **4**.

5. After you have listened to all of your messages, you are returned to the activity menu.

Recording a Message

About this task

You can record a message and send it to another mailbox or several mailboxes at the same time.

- Recordings must be at least 3 seconds long. The system will automatically delete any messages that are shorter.

- If you regularly forward messages to the same group of people, you can create and use a mailing list. See Mailing Lists on page 25.

- You can configure your mailbox to set address before sending or after. See Addressing a Message Before You Record on page 51.

Procedure

1. Log in to your mailbox. See Logging In on page 12.

2. To select recording, press **1**. After the tone, start recording your message:

   - Press **#** to end the recording or press 1 stop to edit the recording that has just been made.

   - Press **1** to stop/start recording.

   - Press **2** to rewind the recording.

   - Press **23** to play back the recording.

   - Press ***3** to delete the recording.

   - Press **#** to approve the recording.

3. You are prompted for the forwarding addresses:

   a. To switch between entering addresses by extension number or by matching user names, press ***2**.

        b. Enter a mailbox number (or dial the required name) and then press **#**.

        c. To select and add a mailing list (see [Mailing Lists](#) on page 25), press ***5** . Press **#** to select one of your own lists. Otherwise, enter the mailbox number of the list owner and press **#**. Enter the number of the list and press **#**.

        d. Repeat until you have entered all the mailboxes to forward the message to.

        e. To delete the last number you entered, press ***3**.

        f. Press **#** to finish addressing.

4. If required, select one of the following options:

   - To mark the message as private, press **1**. Private messages cannot be forwarded to users other than the original recipients.

   - To mark the message as priority, press **2**. Priority messages are played before new messages.

5. Press **#** to send the forwarded message.

Skipping the Mailbox Greeting

About this task

You and other callers can skip the mailbox owners greeting when you are directed to leave a message.

Procedure

1. As soon as you hear the mailbox greeting, press **1**.

2. You hear a tone, after which you can record your message.

Related links

Breakout Options

Your system administrator can configure a number of breakout options. Whilst listening to your greeting, callers may be able to press **0**, **2** or **3** to be transferred to another extension. For example, press **0** to be transferred to your company receptionist.

If your system administrator has configured any of these options, it may be useful to include them in any greetings that your record for your mailbox.

Post-Message Options

About this task

After having recorded a message to be left in a mailbox, rather than just hanging up, you can use the following options.

Procedure

1. Leave a message as normal.

2. Instead of hanging up, press **#**.

3. If required, select one of the following options:

   - To mark the message as private, press **1**. Private messages cannot be forwarded to users other than the original recipients.

   - To mark the message as priority, press **2**. Priority messages are played before new messages.

4. Press **#** to send the forwarded message.

5. Having sent the message, you can now use one of the following options:

   - To login to a mailbox, press ***3**. See Logging In Remotely on page 13.

   - To be transferred to an extension number, press ***8** and enter the extension number.

   - To end the call hang up as normal.

Caller Options on page 23

Chapter 6: Mailing Lists

With mailing lists (also known as personal distribution lists or PDLs) you can store sets of mailbox numbers so that you can send a voice message to several recipients at the same time. This is useful if you often send messages to the same people, for example the members of one or more departments or even the whole company.

Your mailbox can have up to 20 mailing lists associated with it. Each list can contain up to 360 mailbox numbers. Lists can be private or public. Private lists can be used only by you while public lists can be used by other mailbox users when they forward a message. If you create a public list it cannot be modified by other users. When you address a message, you can select one of your own mailing lists or a public list from a different mailbox.

Once a list has been created, it can be used to send and forward messages using the telephone. The list can also be changed or deleted using the telephone.

Related links

Creating a Mailing List

About this task

You can create up to 20 mailing lists for your mailbox. Each mailing list can contain up to 360 mailbox numbers. Once a list has been created, it can be used to send and forward messages using the telephone. The list can also be changed or deleted using the telephone.

Procedure

1. Log in to your mailbox. See Logging In on page 12.

2. Press **5** for personal options.

3. Press **1** for mailing list options.

4. Press **1** to create a new mailing list.

5. Enter a number to identify the list and then press **#**.

   • The list identifying number must be less than 6 digits long. If the number is too long or already in use you are prompted to enter a different number followed by **#**.

6. Mark the list as private or public:

   • To mark a list a private, press **1**. A private list can only be used by you.

   • To mark a list as public, press **2**. A public list can be used by other users.

7. When prompted, start adding mailboxes to the mailing list. To add a mailbox enter the mailbox number and press **#**. For local mailboxes the name of mailbox user is confirmed. You can also select the following options while you add mailboxes:

   • Press ***2** to switch to selecting mailboxes by name.

   • Press ***5** to import the contents of another public mailbox list.

     - You are asked to enter the mailbox number of the list owner followed by # and then the list number followed by **#**.

     - If the mailbox or list is not valid or the list is private you are returned to the option for creating a mailbox list in the usual way.

     - If the list exists and is public, its contents are imported as long as importing does not result in a list of more than 360 entries. Any duplicate entries are automatically removed.

8. Press **#** to finish.

[Mailing Lists](#) on page 25

Chapter 7: Greetings

By default, callers directed to your mailbox hear the default system greeting and your recorded name (see Recording Your Name on page 51). However, you can replace this with your own greetings.

Temporary Greeting

You can record a temporary greeting and specify how long in days it should be used. When you have a temporary greeting active, it overrides all your other mailbox greetings. See Creating a Temporary Greeting on page 39.

Personal Greetings

You can record a library of up to 9 personal greetings for a mailbox to which you have access. You can then select when a particular greeting is used. For example, you can assign different greetings to internal calls and external calls.

You can assign greetings to the call types listed below. If you have assigned greetings to several calls types, the first one in the list that is applicable is used.

1. **Temporary Greeting**
2. **Out of Service** *(hunt group mailboxes only)*
3. **Out of Hours** *(hunt group mailboxes only)*
4. **All Calls**
5. **Internal Calls**
6. **External Calls**
7. **Number engaged calls**
8. **No reply calls**
9. **Default**

Breakout Options

Your system administrator can set up a maximum of three transfer options. If any transfer options have been created any caller who is directed to your voicemail can be given the option to be transferred to a different extension. The transfer options available are 0,2 and 3. Ideally a transfer option should be to an extension where a person is expected to answer. If a transfer results in the caller being diverted to a mailbox on the same system, they will be returned to your voicemail box.

If you are using the transfer options you should record a new greeting message to inform callers that if they press 0, 2 or 3 they will be transferred accordingly.

Recording a Greeting on page 32

Recording a Greeting

About this task

You can record a library of up to 9 greetings that can be used as either a temporary greeting or as personal greetings applied to specific call types. The greetings are heard by callers when they are directed to your voicemail.

At any time you can listen to a greeting message and re-record it.

- A greeting must be longer than 3 seconds. The maximum length of a greeting is 120 seconds.

- If you record a personal greeting, you can choose to not assign the greeting until you need it used.

- If your system administrator has configured any breakout options (see [Breakout Options](#) on page 23), you should mention them in your greetings.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **3** to select personal greetings.

   - If you have any active call types, you hear an announcement listing them. For example, *"For internal calls greeting 1 active"*.

   - If a temporary greeting is active, you hear how many days it will be active. To deactivate it, press **1**. To leave it active, press **#**.

3. Press **1** to create, change or delete a greeting.

4. When prompted, select the greeting (1 to 9) you want to change. The system announces if the greeting is active (in use) for any call types.

5. At the tone, start speaking.

6. When finished, press **1**.

   - To play back the greeting you have just recorded, press **23**.

   - If you want to add to the recording, press **1**. Start speaking and press **1** when finished.

- Press **#** to confirm the recording.

7. To save the recording, press **#**.

Next steps

The new greeting can be assigned to a call type by:

- Selecting the call type and then assigning the greeting. See <u>Assigning a Greeting to a Call Type</u> on page 33.
- Selecting the greeting and activating the greeting for a type of call. See <u>Activating a Greeting</u> on page 35.

[Greetings](#) on page 31

Creating a Temporary Greeting

About this task

When a temporary greeting is being used, no other greetings are active. The temporary greeting can be selected for a certain number of days, the maximum number of days being 30. When you enter the number of days the end date is calculated and announced. When the temporary greeting time expires the greetings that you have assigned to specific call types are used. If you have no other greetings assigned the system default greeting will be played to callers.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **3** to select personal greetings.

   • If you have any active call types, you hear an announcement listing them. For example, *"For internal calls greeting 1 active"*.

   • If a temporary greeting is active, you hear how many days it will be active. To deactivate it, press **1**. To leave it active, press **#**.

3. Press **4** to administer call types.

4. Press 9 for temporary greeting.

5. Press 1 to record the greeting. Speak after the tone.

6. Press # when finished recording.

7. Enter the number of days that you want the greeting to be active for and press **#** when finished.

8. You will hear an announcement stating that your temporary greeting is active and the number of days that the greeting will remain active.

   • If the number of days selected is between 1 and 30, the greeting is active for the selected number of days. When the number of days has expired your temporary greeting no longer works.

   • If the number of days selected is 0, the selected greeting is your permanent greeting for all voicemail calls. The temporary greeting replaces the system default greeting.

9. Press **#** when you have finished to return to the greetings menu.

Chapter 8: Voicemail Notification

If you have an Avaya 9600 Series or J100 Series phone, it will automatically provide message waiting indication to you for when a new message arrives in your mailbox. Your system administrator can also configure it to provide notification for messages in other mailboxes.

This section covers additional methods of receiving notification of a new message.

Related links

Turning Ringback On or Off

About this task

Ringback is a feature where the voicemail system calls you if you have new messages. It waits until your telephone is in use, to confirm that you are present, and calls you when you end your next call. You can switch voicemail ringback on or off at any time.

- Ringback is not the same as outcalling. Ringback works with your own extension number. Outcalling can be configured to call a number other than your own extension.

Procedure

At your extension:

- To turn ringback on, dial ***48**.

- To turn ringback off, dial ***49**.

Related links

Outcalling

The voicemail service make a call and, if answered, tell you that you have a new message. You can then select to either cancel the notification or to login to your mailbox.

> ⓘ **Important:**
>
> - By default outcalling is disabled. Your system administrator will inform you if it is supported on your system.
> - Your system administrator can configured your mailbox outcalling settings if required.

Destinations

You can define 5 outcalling destination numbers. These are called **Desk**, **Home**, **Mobile**, **Delegate** and **Other**. See Configuring Your Outcalling Destinations on page 43.

For each destination, you can also set how long it is rung when used.

Escalation List

You can add the destinations that you setup to an escalation list. Each time the system makes an outcalling call, if not answered at the first destination, it will try the next destination in your list.

Schedule

You can select to when outcalling is used, see Selecting When to Receive Outcalling on page 47. The defaults are:

- **Anytime:** 24 hours a day.
- **Prime times:** 09:00 to 19:30.
- **Peak times:** 09:00 to 17:30.

You can also define you own set of hours for when you want outcalling used. See Specifying Your Own Time Schedule on page 48.

Retries

If the system does not receive any response to an outcalling attempt (see Answering Outcalling Calls on page 49), it follows a retry schedule. The default schedule limits the number of retries to 5 and adds a increasing delay between each retry.

The default retry settings are:

- **1st Retry:** 1 minute.
- **2nd Retry:** 5 minutes.
- **3rd Retry:** 10 minutes.
- **4th Retry:** 15 minutes.
- **5th Retry:** 30 minutes.

Configuring Your Outcalling Destinations

About this task

You can add or change the destinations and telephone numbers that outcalling uses. For each destination number you can set the time out length. This is the length of time (in seconds) that the destination telephone rings when notification of a new voicemail message is received. The default time is 15 seconds with the maximum time period being 99 seconds.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. To change your outcalling settings, press **6**.

3. Press **1** to configure your outcalling options. A list of outcalling destinations is played.

4. Select the outcalling destination to configure. An announcement tells you your current outcalling settings.

   - If you selected the incorrect destination, for example Desk instead of Home, press **1**. The list of destinations is played again. Select the required destination.

5. Press **2** to change or enter the destination number.

6. Press **1**, enter the new destination number then press **#**. The telephone number entered is played back.

   - if you must re-enter the destination number, press **1**.

   - Press **#** to accept and enable the new destination.

7. If required you can change the numbers ringing timeout:

   a. To change the timeout, press **2** .

   b. Enter the new value between 5 and 99 seconds and press **#**.

8. The new settings are played. Press **#** to accept and enable the new configuration.

9. Press ***7** to return to the activity menu.

Changing the Timeout Setting

About this task

For each destination number you can set a timeout. This sets how long time the destination is rung when called. The default time is 15 seconds.

If the destination specified is an internal number, outcalling will not go to voicemail if it is not answered. However, for external number care should be taken. For example, you should set the outcalling timeout to be shorter than your mobile phone's own voicemail setting.

Procedure

1. Log in to your mailbox. See Logging In on page 12.

2. To change your outcalling settings, press **6**.

3. Press **3** to change a destination telephone number. A list of possible destination options is played.

4. Select the destination to change.

    • Press **1** for Desk.

    • Press **2** for Home.

    • Press **3** for Mobile.

    • Press **4** for Delegate.

    • Press **5** for Other.

5. The telephone number configured for the selected destination is announced.

6. Press **#** to return to the outcalling menu.

7. If required you can change the numbers ringing timeout:

    a. To change the timeout, press **2** .

    b. Enter the new value between 5 and 99 seconds and press **#**.

8. Press ***7** to return to the activity menu.

Creating an Escalation List

About this task

You can create a list of your outcalling destinations, called an escalation list. Each time the system makes an outcalling call, if not answered by the first destination in the list, it will try the next destination and so on.

For example, you can select that new voicemail notification sent to your desk. If there is no response, the system can then call your mobile number. If again there is no response, it can call your home number.

When you create an escalation list you can select between two and five different destinations. If needed, you can add the same destination to your escalation list more than once.

Procedure

1. Log in to your mailbox. See Logging In on page 12.

2. To change your outcalling settings, press **6**.

3. Press **1** to configure outcalling.

4. Press **6** to select escalation.

5. Press **1** to change or configure the locations for escalation. An announcement of the locations available is heard.

6. Select the locations for the escalation. If you have not defined a number for the destination, you are prompted to enter the telephone number and the time out period or select a different destination.

   • Press **1** for Desk.

   • Press **2** for Home.

   • Press **3** for Mobile.

   • Press **4** for Delegate.

   • Press **5** for Other.

7. When you have selected the required locations, press **#** to finish the escalation list.

   • Press **1** to re-select the destinations.

   • Press **3** to listen to the destinations selected.

   • Press **4** to listen to the destinations and telephone numbers selected.

   • Press **2** to accept the list. You are returned to the outcalling main menu.

Next steps

When you have created an escalation list you can select to receive notification using the default settings of prime time, peak time or any time, see Selecting When to Receive Outcalling on page 47. You can also specify your own time schedule, see Specifying Your Own Time Schedule on page 48.

[Outcalling](#) on page 41

Selecting When to Receive Outcalling

About this task

You can select to receive outcalling notification during the prime or peak time periods. The time periods are set globally by your system administrator and may have been changed from the default setting. The default times are:

- **Anytime:** 24 hours a day.
- **Prime times:** 09:00 to 19:30.
- **Peak times:** 09:00 to 17:30.

You system administrator can adjust the settings if required.

The times are based on the location of the voicemail server which may be different from your time zone. For details, contact your system administrator.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. To change your outcalling settings, press **6**.

3. Press **2** to change the outcalling times:

   - To receive outcalling at anytime, press **1**.
   - To receive outcalling during prime time periods, press **2**.
   - To receive outcalling during peak times, press **3**.
   - To specify your own outcalling schedule, press **4**. See [Specifying Your Own Time Schedule](#) on page 48.
   - To hear the system outcalling schedule. When the schedule times are announced you can select the time period.

4. You will hear an announcement of the new outcalling settings.

Specifying Your Own Time Schedule

About this task

You can create your own time profile to select when you will receive outcalling notification. You can change the times of each time period and select when to turn outcalling on. The default time profile is:

- From time A currently 9 am to time B currently 5.30 pm, outcalling is turned on/off.
- From time B currently 5.30 pm to time C currently 7.30 pm, outcalling is turned on/off.
- From time C currently 7.30 pm to time A currently 9 am, outcalling is turned on/off.

Procedure

1. Log in to your mailbox. See Logging In on page 12.

2. To change your outcalling settings, press **6**.

3. Press **2** to change the outcalling times:

4. Press **4** to specify your own times.

5. Press **1** to change your time profile settings. You hear an announcement of the current settings for the time period A to B.

   a. To change the destination, press **1**. Select the new destination (1 to 5). Its details are announced. Press **#** to enable.

   b. To turn outcalling on for all new messages, press **1**. To turn it on for just new priority messages, press **2**.

   c. Press **2** to change time A.

   d. Press **3** to change time B.

   e. To accept the settings for the time period, press **#**.

6. You will hear the current settings for the time B to C settings.

   a. To change the destination, press **1**. Select the new destination (1 to 5). Its details are announced. Press **#** to enable.

   b. To turn outcalling on for all new messages, press **1**. To turn it on for just new priority messages, press **2**.

   c. Press **2** to change time C.

   d. To accept the settings for the time period, press **#**.

7. You will hear the current settings for the time C to A settings.

   a. To change the destination, press **1**. Select the new destination (1 to 5). Its details are announced. Press **#** to enable.

   b. To turn outcalling on for all new messages, press **1**. To turn it on for just new priority messages, press **2**.

c. To accept the settings for the time period, press **#**.

8. Press **#**. You are returned to the outcalling main menu.

Answering Outcalling Calls

About this task

When you are notified of a new voice message you hear the announcement "You have new messages. To access your messages, please enter your extension number and press hash. To avoid further notification of these messages, press star hash".

If you do not answer the call or do answer but do not respond, the system will try the next number in your escalation list if you have one. See [Creating an Escalation List](#) on page 46. If there is no answer from any number tried, the system will try outcalling again at a later time following its retry schedule. See [Outcalling](#) on page 41.

Procedure

1. Answer the telephone call.

2. When you hear the outcalling announcement:

   • To cancel the outcalling, press ***#**. The outcalling is cancelled for the current new message. Your will still receive outcalling for any further new messages.

   • To answer the outcalling, press **#**. You can now login to voicemail as normal.

Changing Your Password

About this task

If you set a password to restrict access to your mailbox, you can change it whenever you like. For security reasons, you should change your password periodically.

If necessary, your system administrator can set a voicemail password for you. You can then use that password to access your mailbox but the system may then prompts you to change the password.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **5** for personal options.

3. Press **4** to change your password.

4. Enter the new password and press **#**.

   - You must select a password of at least 6 digits. The system allows passwords of up to 15 digits.
   - Your password cannot be the same as your extension number, use repeated digits or include consecutive numbers.
   - Other common key pad patterns such as 1397 are not allowed.
   - Your system administrator can change some of the minimum requirements and will inform you if they are different.

5. Re-enter the new password and press **#**. You hear a message to confirm that your password has been changed

Recording Your Name

About this task

Your name is played as a confirmation when you log in to your mailbox. It is also used for other system announcements and for the directory search feature of the system. You can re-record your name at any time.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **5** for personal options.

3. Press **5**. If you have already recorded your name, you hear it played back to you. You also hear an explanation of when your name is used.

4. After the tone, speak your name and then press 1 to stop recording.

   • Recordings must be at least 3 seconds long. The system will automatically delete any messages that are shorter.

5. Your recording is played back.

   • To record your name again, press **1**.

   • To accept the recording, press **#**.

6. Hang up or choose another option.

Addressing a Message Before You Record

About this task

You can select whether to set the address for a message before or after you record. The default is off, which means that you set the address after recording the message. When switched on, you are asked to specify the extension numbers of the recipients before you record the message.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **5** for personal options.

3. Press **6**. You hear a message that tells you whether the **Address before Record** option is turned on or off.

4. To change the setting, press **1**. You hear a message confirming your change.

Preventing Further Calls and Messages

About this task

You can prevent further callers from leaving messages. Instead, callers hear your name and the message "Sorry, the mailbox you have reached is not accepting messages at this time. Please disconnect". This does not stop other mailbox users from forwarding messages to your mailbox.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **5** for personal options.

3. Press **7**. You hear a message that tells you whether the option is on or off.

4. To change the setting, press **1**. You hear a message confirming the change.

Setting the Order of Message Playback

About this task

When you log into your mailbox, messages are played to you in the order in which they were received. You can specify the order in which different types of incoming messages (voice, email and fax) are played. For example, you can choose to hear emails first or fax messages before voice messages.

Whichever order you specify, new messages are presented first followed by old or read messages. While you are listening to your messages, you can press ***#** to skip to the next type of message.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **5** for personal options.

3. Press **8** for media preferences. You hear an announcement telling you your current preference.

- To select no preference, press **0**.

- To make voice calls your preferred media, press **1**. Your voice messages will be played first, followed by fax and then email messages.

- To make fax messages your preferred media, press **2**. Your fax messages will be played first, followed by voice and then email messages.

- To make email messages your preferred media, press **3**. Your email messages will be played first, followed by voice and then fax messages.

- To retain your current preferred media, press **#**.

Chapter 10: Fax Messages

Your voicemail system can be configured to handle fax messages. If so, when you listen to your messages, you are told which are faxes and can hear details of the fax sender, date and time and length (approximate pages).

You can then manually forward fax messages to either the systems default fax number or to a number you specify at the time.

You can also configure a personal fax number to which you want any faxes received by your mailbox automatically forwarded.

Related links

Forwarding a Fax Messages

About this task

If you receive a fax message in your mailbox, you can forward it to the default system-wide fax number, typically your company fax machine. Alternatively, you can forward a fax message to a fax number that you specify, see .

Procedure

1. Log in to your mailbox. See .

2. If any of your messages are faxes, press ***1** for fax options.

3. Either:

   - Press **#** to forward the fax message to the system fax number. Press **#** to confirm.

   - Type the number to which the fax is to be forwarded and press **#**. The fax number that you have specified is played back to you for confirmation.

Setting a Personal Fax Number

About this task

If your system administrator has set a system fax number, any fax calls to your mailbox are diverted to the specified number. You can override this from your telephone handset and set your own personal number for printing fax calls that are received in your mailbox. This is useful if you are not in the office and want to use a different fax number.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **5** for personal options.

3. Press **3** for fax preferences.

4. If you hear the prompt "*A default print destination has not been defined"* this is because a default system fax number has not been set. You cannot set up a personal fax number until a default system fax number is set by your system administrator. Press ***7** to return to the activity menu.

5. If a personal fax print number is already set, it is played to you. Press **1** to change the default fax destination.

   a. Enter the telephone number of the fax machine that you would prefer to use instead. The fax number can be up to 23 digits long.

   b. Enter **#** when you have finished typing the fax number. The new default destination is played to you.

6. Press ***7**.

Related links

[Fax Messages](#) on page 54

Deleting Your Personal Fax Number

About this task

At any time you can delete a personal fax number, if you have set one, and return to using the system fax number.

Procedure

1. Log in to your mailbox. See [Logging In](#) on page 12.

2. Press **5** for personal options.

3. Press **3** for fax preferences. If you have a personal fax number set, it is played to you.

4. Press ***3** to delete the personal fax number. Your personal fax number is deleted and the system fax number is played to you. The system fax number is now used for any future fax messages that you receive.

[Fax Messages](#) on page 54

Chapter 11: Visual Voice

Visual Voice allows you to navigate your voicemail mailbox and settings using menus displayed on your phone rather than following spoken prompts.

Related links

Logging into Visual Voice

About this task

Visual voice is a set of display menus that allow you to navigate the contents of a mailbox and the mailbox settings. See .

By default, the ✉ button on Avaya phones accesses the visual voice menus for the phone user's mailbox.

- You system administrator can also configure the visual voice menus for your phone to provide access to messages in other users and groups mailboxes.

Procedure

1. Either:

   a. Press the ✉ button on your Avaya phone.

   b. Press **Features**. Scroll down to **Visual Voice** and press **Select**.

   c. Press the optional **Visual Voice** button that has been programmed on your phone.

2. The visual voice options should appear on the phone's screen. See .

3.

Visual Voice Controls

The arrangement of options on the screen varies depending on the phone type and display size.

Label	Description

Listen	Access your own voicemail mailbox and see the number of different types of messages. Select one of the options to access those messages and use the options below:
	
	• **Play**: Play the message.
	
	  - To select the next message or previous message, use the phone's up and down cursor keys.
	
	  - To fast forward or rewind the current playing message by 5 seconds, use the phone's left and right cursor keys.
	
	• **Pause**: Pause the message playback.
	
	• **Delete**: Delete the message.
	
	• **Call** : Call the message sender if a caller ID is available.
	
	• **Copy**: Copy the message to another mailbox. When pressed, a number of additional options are displayed.

Message	Record and send a voicemail message to another mailbox or mailboxes.
Greeting	Change the main greeting used for callers to your mailbox. If no greeting has been recorded then the default system mailbox greeting is used.
Email	This option appears if you have been configured with an email address. You can see and change the current voicemail email mode being used for new messages received by your voicemail mailbox. Use **Change** to change the selected mode. Press **Done** when the required mode is displayed. The modes are: • **Email Mode Off**: Voicemail email is not used. • **Email Mode Copy**: Copy new voice messages to your email address, leaving the original message in the mailbox. • **Email Mode Fwd**: Forward new voice messages to your email address, deleting the original message from the mailbox. • **Email Mode Alert**: Send an alert email message to your email address, leaving the message in the mailbox.
Password	Change the voicemail mailbox password. To do this requires entry of your existing password.
Voicemail	Switch voicemail coverage on/off. When off, you system does not redirect unanswered calls to your mailbox.
