

1400 Series Digital Deskphones

Intuitive Interface, Advanced Audio

Designed to Expand With Your Communication Needs

- **Provide a familiar interface, combining the best of past and present, for ease of use and efficiency.** Fixed keys—familiar to any phone user—provide easy access to the most common features, while flexible softkeys provide contextual guidance and prompts.
- **Satisfy even the most discerning users with the clear, clean audio that's delivered by integrated speakerphones and other advanced technology.** Headsets can be attached easily to the 1408 and 1416 models. The 32-button expansion module for the 1416 can be programmed to deliver a wide range of features.

1403 Digital Deskphone

Designed for visitors and other occasional users, this phone provides a simple, familiar interface. It is ideal for common locations of office phone systems, including stockrooms, lobbies, or drop-in desks. The 1403 is compatible with the Avaya IP Office™ Platform only.

1408 Digital Deskphone

Designed for cubicle workers, sales staff, and other users with relatively simple telephone needs, the 1408 office phone system delivers a straightforward, productivity enhancing interface.

1416 Digital Deskphone

This deskphone is designed for receptionists, assistants, managers and other navigator users—people who answer incoming calls, transfer customers, and monitor several lines throughout a typical day. This phone provides the most one-touch line/feature/speed-dial buttons, improving productivity and eliminating the need to scroll through on-screen lists.
